INTRODUCTION

SUBWEB Oil & Gas Service Limited was incorporated in 2013 by group of professionals as a result of many years' experience both in Nigeria and worldwide commercial oilfield operations, as leading provider of Diving service, Marine Construction, Offshore Support Services, ROV Services, and Environmental Services including Manpower support, also an internationally recognized company. Our proven professionalism defined us as a company, and we are known for timely delivering of projects in a safe and efficient manner free from accident.

Our experience enables us to adapt quickly to unique problems and resolve potentially costly situations. In addition, we have the proven ability to customize systems and management teams for individual projects. We are ready to take your project to the next level safely, in a quality manner, with the use of model technologies.

We are one of the few full-service underwater marine contractors that can provide project management, commercial Diving/ROV supports and other services, and a full spectrum of environmental services. We have been successful because of our many years of experience engaging in commercial oilfield operations management.

SUBWEB CONTENT

In the Diving Industry is often misrepresented that diving operation is risky due to insufficient knowledge about the sector.

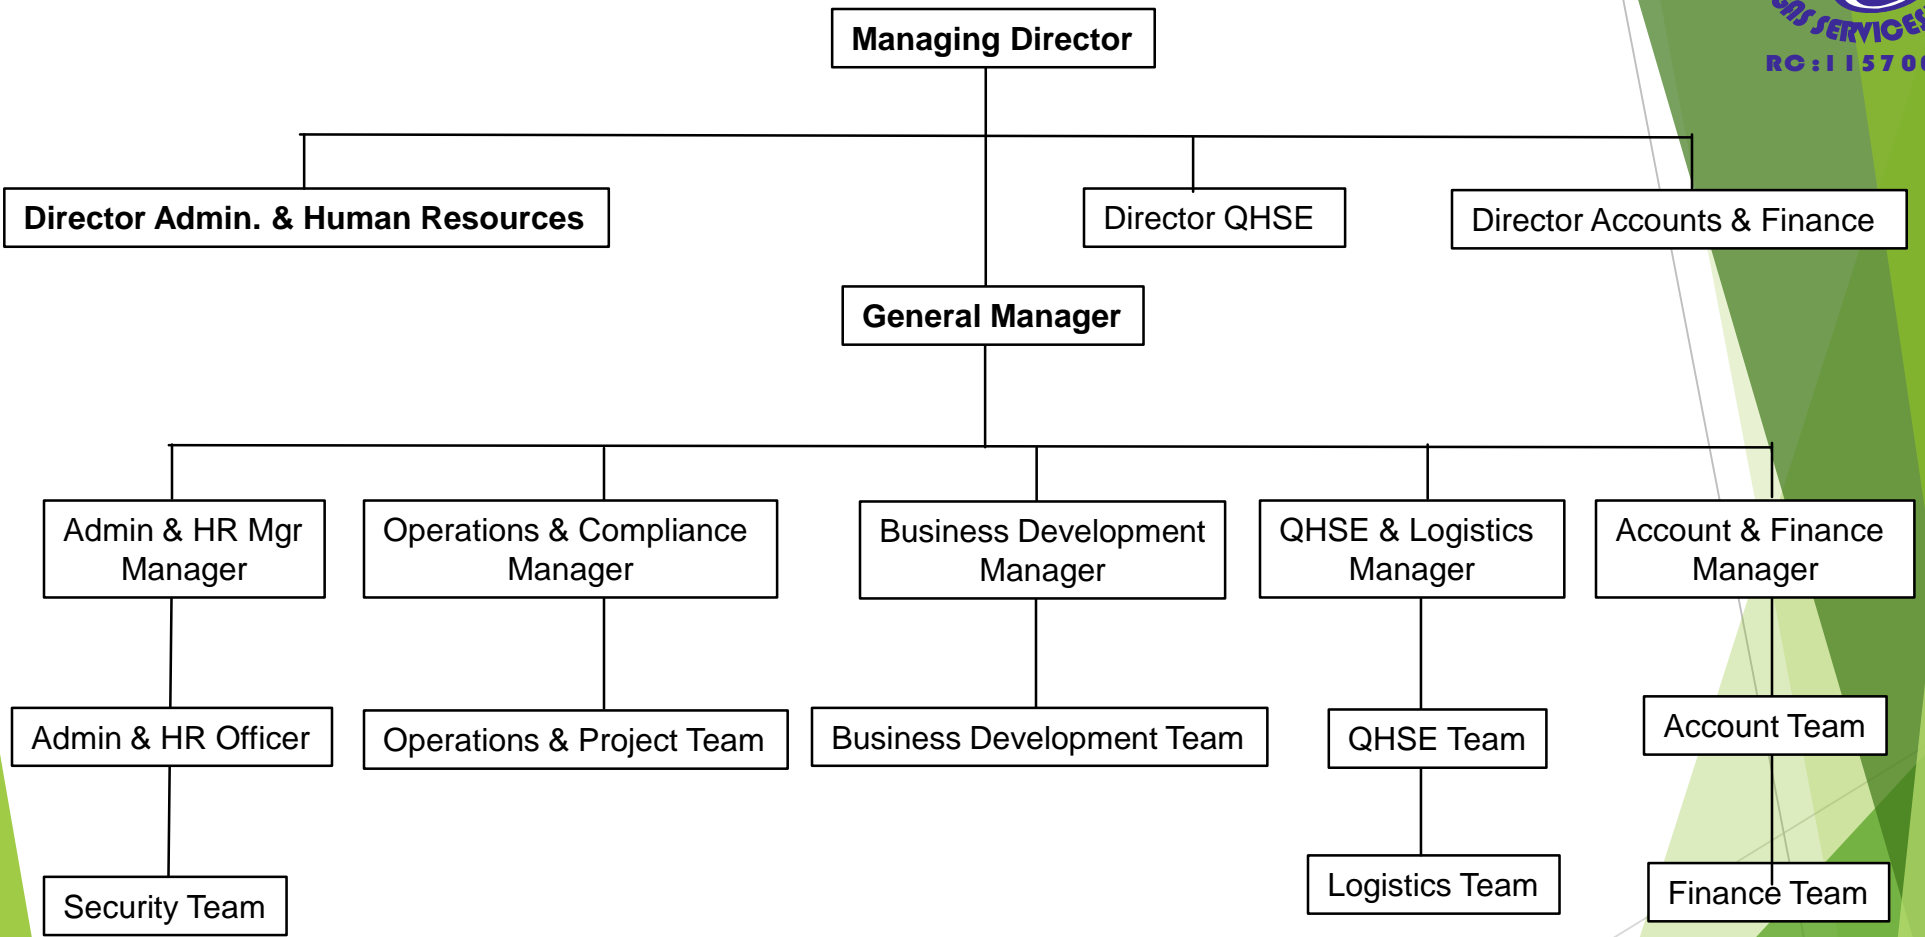

The need to employ concerted mythology strategies for the advancement of diving operation agenda cannot be overruled to ensure safe diving project and operations.

SUBWEB offers its platform for such strategy cultivation and grooming of developmental initiative through imbued years of experience as professionals engaging in diving activities and in-depth analysis of diving operations.

We believed that industry player will be confident and knowledgeable about the management of diving risks safely after employing the service of SUBWEB due to there vast experience in the Oil & Gas Sector.
